GREAT IMPROVEMENT IN DENTISTRY.

The attention of the public is called to a great discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plates while eating. I have discovered when the teeth are set that they will not drop or drop while eating or speaking, neither will any particles of food get under the plate to matter what the condition of the mouth is, which is not true of any method hitherto used. I have secured Letters Patent on the United States, England and France.

The improvement is not in material, but in the construction, which secures the atmosphere pressure on the entire plate.

I have used the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Franklin, Washington, Chittenden, Lamoille and Grand Isle. Those wishing to avail themselves of such improvement, will call on
